INTRODUCTION

- Resume Builder is a web-based application developed using Python and Django.
- It helps users create professional resumes quickly and efficiently.
- Users can enter personal, educational, and professional details.
- The application generates resumes in different templates.
- Users can download resumes in PDF format.

DESCRIPTION

- The **Online Resume Builder Using Python and Django** is a web-based application developed to simplify the process of creating professional resumes. The system enables users to create well-structured and attractive resumes without requiring any technical knowledge or design skills.
- In today's competitive world, a resume plays a crucial role in securing employment opportunities. Many students and job seekers face difficulties in preparing resumes due to a lack of formatting knowledge and professional design experience. Manual resume creation is often time-consuming and may result in formatting errors.
- The system allows users to select different resume designs, preview their resumes, and download them in PDF format. It reduces the time and effort required for resume preparation while ensuring a professional appearance.

PROBLEM STATEMENT

- **Problem Statement:**

- Manual resume creation consumes time.
- Formatting resumes is difficult for beginners.
- Different resume designs require additional effort.
- Editing resumes repeatedly is inconvenient.
- Many users lack technical or design knowledge.

- **Solution:**

- The Resume Builder system provides an easy-to-use platform for creating professional resumes within minutes.

OBJECTIVES

The key objectives of this project are:

- To develop an online resume creation system.
- To provide multiple resume templates.
- To allow users to download resumes as PDF files.
- To implement secure user authentication.
- To maintain user-specific resume records.
- To reduce time required for resume preparation.

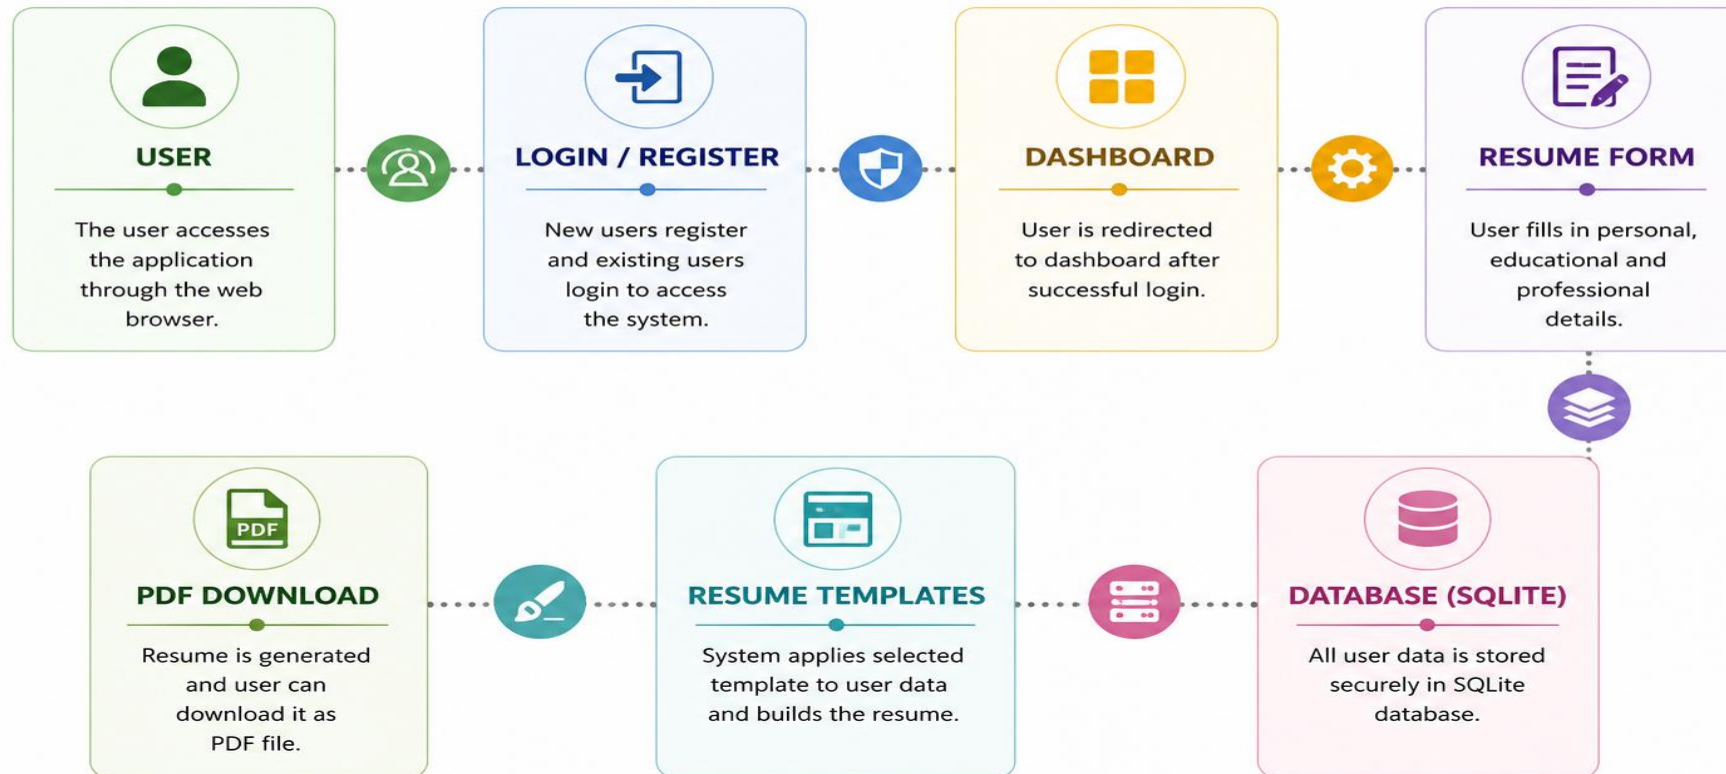

TECHNOLOGIES USED

Technologies used:

- Python
- Django
- HTML
- CSS
- SQLite
- Xhtml2pdf
- Bootstrap

SYSTEM ARCHITECTURE

SYSTEM ARCHITECTURE

FEATURES OF THE PROJECT

Features:

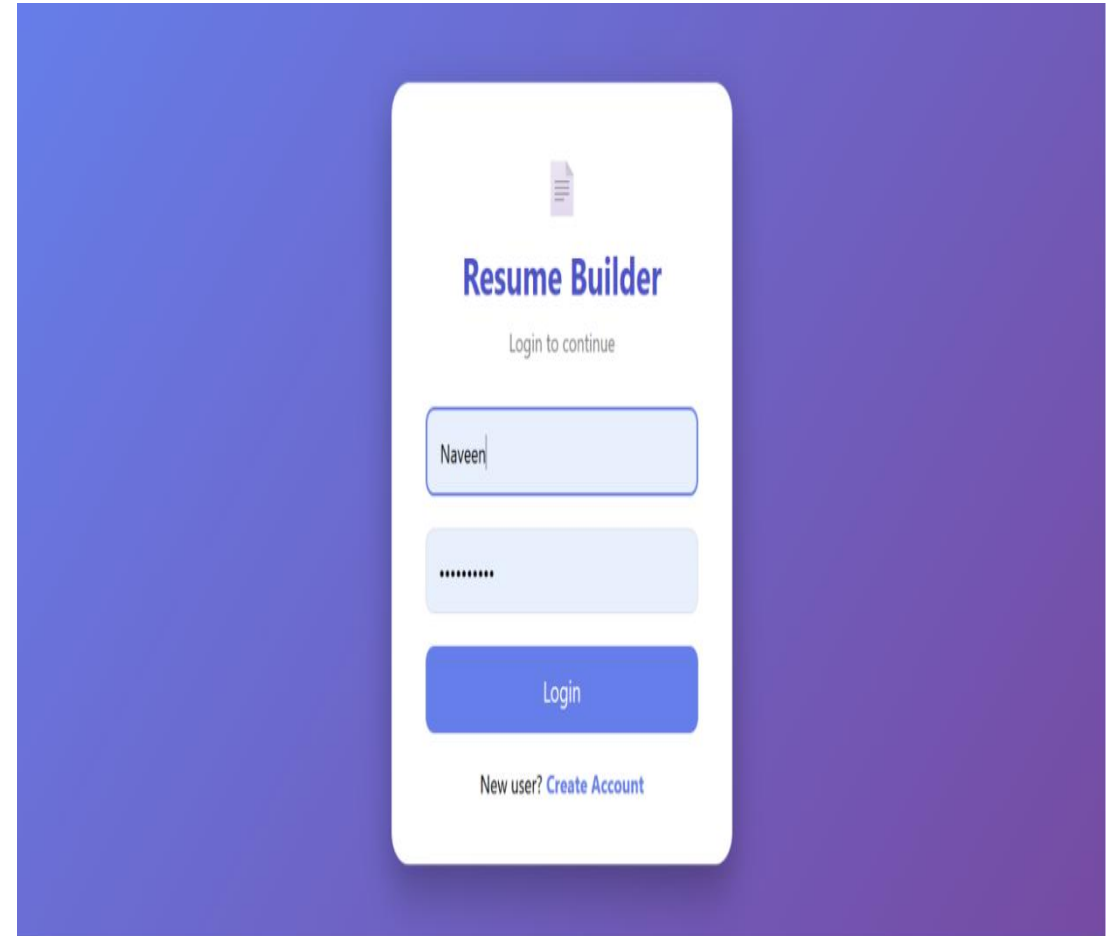

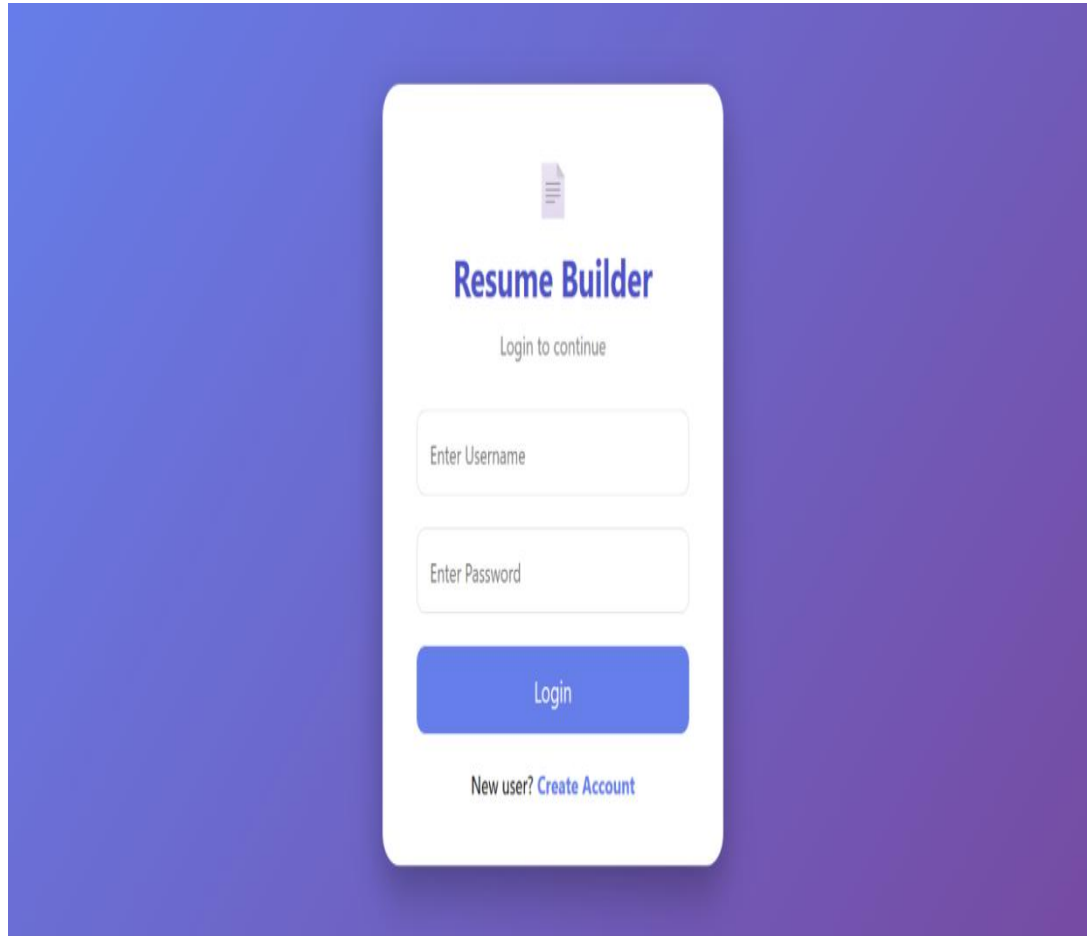

- User Registration
- User Login
- Dashboard
- Resume Creation
- Multiple Templates
- PDF Download
- My Resumes
- Delete Resume
- Django Admin Panel
- Secure Authentication

PROJECT IMPLEMENTATION

User Workflow:

- User Registration
- User Login
- Dashboard Access
- Enter Resume Details
- Select Resume Template
- Generate Resume
- Download PDF
- View Previous Resumes

ADVANTAGES OF THE SYSTEM

- Saves time
- Easy to use
- User-friendly interface
- Secure login system
- Multiple templates
- Quick PDF generation
- Data management
- Professional resume output

FUTURE ENHANCEMENTS

- Profile Photo Upload
- More Resume Templates
- Cloud Storage
- Resume Sharing
- Email Resume
- AI-based Resume Suggestions
- Online Deployment
- Mobile Application

CONCLUSION

The **Online Resume Builder using Python and Django** successfully provides an efficient platform for creating professional resumes. The system simplifies resume preparation by offering secure user authentication, multiple resume templates, and PDF generation features. It reduces manual effort, saves time, and helps users create professional resumes quickly and effectively.
